

Postgraduate position in cellular metabolism - Shen laboratory

The Laboratory of Assistant Professor Hongying (Hoy) Shen at Systems Biology Institute at Yale West Campus and Cellular & Molecular Physiology at Yale School of Medicine (starting Jan 2020) is currently seeking postgraduate associate to join the team to study cellular metabolism. The Shen lab uses multidisciplinary approaches ranging from biochemistry, enzymology, cell biology, genetics, and mass spec-based metabolomics to study cellular metabolism underlying human health and diseases.

The ideal candidates should have undergraduate or master degree majored related to biology, chemistry or engineering. The candidate will work independently to drive the projects and perform as part of a team working with other members in the laboratory. The candidate will be trained in techniques in cell biology (CRISPR gene editing) and state-of-art mass spec metabolomics techniques.

The position is for 1 year (with the possibility to be extended), with start availability as early as Jan 2020.

To learn more about the lab please visit the website: hoyshenlab.org

If you are interested in this position, please send your CV/resume, a brief description of previous research experience and contact information of two references to the PI at

hongying.shen@yale.edu

Yale University is an Affirmative Action/Equal Opportunity Employer and welcomes applications from women, members of minority groups, persons with disabilities and protected veterans.
